BEATRICE MILLS MADE BRIDE OF EARL GRANARD

Ceremony at Father's Home Marked by Lavish Expenditure Chiefly for Flowers.

ONLY 250 GUESTS.

The Marriage Took Place Before Altar of Lilies in Rose-Covered Ballroom.

which attend the marriage of an American millionaire's daughter into the foreign nobility, Miss Beatrice Mills was wedded this afternoon to the Earl of Granard. The ceremony was performed in the ballroom of the Mills home at No. 2 East Sixty-ninth street, and was witnessed by 250 guests.

Because of the difference in the religious faiths of the bride and bridegroom a great church wedding was impossible, and thereby was avoided a stupendous crush of the sort that attended the wedding of the Duke of Roxburghe and Miss Goelet. However, nothing was left undone that could tend toward display and lavishness.

Rare Flowers Everywhere. The entire residence had been put in the hands of decorators, and to-day the big stone house was a bower of beauty from entrance hall to Louis XV. ballroom, which is on the top floor.

The walls and ceilings of the ballroom, where the ceremony was performed by Bishop Cusack at 3 o'clock this af- FOUND MOTHER-IN-LAW ternoon, were hung with white brides roses, interspersed with rehids. Around the panels of mirrors which dec orated the enormous room were garni tures of smilax, gracefully caught back by bunches of brides' roses.

A temporary altar of Easter lilies had been erected at the north end of the room, where an immense wedding bell of the same flowers hung from the ceiling.

Two hundred and fifty chairs were placed in this room, the aisles being decorated with white ribbons, roses and orchids, and here the relatives and in timate friends of the Mills family as sembled to witness the ceremony which added another American girl to the English peerage.

New York has seen daughters of the rich take unto themselves a coronet at functions so elaborate as to arouse unfavorable criticism, but the wedding of Miss Mills to-day set a new stand the lavish debut of the Mills twins. The marble entrance hall where the guests were received was festooned in Ameri can Beauty roses. In the reception drawing and dining rooms, which are upon the same floor, this regal flower was fund, making the entire first floor a harmony in red, while the color scheme of the library floor was pale pink, great masses of tea roses being

The Wedding Ceremony.

When Miss Mills entered the ballroom on the arm of her father, D. Ogden Mills, wearing a gown of white satin, cut in a severe Directoire style, an orchestra of stringed instruments played the Wedding March from 'Lohengrin." Throughout the ceremony "O Perfect Love" was rendered by a full choir, and Mendelssohn's Wo ding March finished the programme The bride's gown was especially designed for her with an embellishin of brocaded embroidery around the hem The court train, which fell from the bride's shoulders, was trimmed with th old point d'Alencon lace worn by Mil Mills's mother at her own wedding. veil of the same lace was held in place by a wreath of orange blossoms

Miss Mills made an original depart ture in the way of attendants, having four little girls instead of gir friend as her bridesmaids. The four tiny a tendants the daughter of Moses Tayle Courtland: Field Blanop, Clarence Mackay and Col. John Jucob Astor wore caps of white lace and white ill erry satin frocks covered with silver lace. From baskets of pink roses they strewed the path of the bride as she walked up the aisle.

The Hen. Donald Forbes, the Earl Granard's brother, was best man ushers Messrs. Ogden L. Mills, truthe c the bride, Ogden Mills Rold, p. cousin: L. F. Holbrook Beits, Cha-D. Wetmore and Henry Cari

That This California Oil Co. Will Absolutely Be a Big Producer and Should in 8 Months Be Paying Good Dividends, and in 2 Years Be Paying Over 40% on Par.

consequently the best proof of anything is the experience of others similarly situated. so while we might prove our contentions about what we may expect from the stock of our Company by citing such instances as the Union Oil Company, which in 1906 paid its stockholders a dividend of 99 per cent. and in 1907, 140 per cent., or the California Oil Fields, Ltd., which has for several years paid 30 per cent. on par, and show such in-

Fields, Ltd., which has for several years paid 30 per cent. or the California official stances of advances in price as in the case of the Pinal Oil Company, whose stock advanced from a few cents a share to \$5.00 a share, or the Hanford Oil Company from \$10.00 a share to \$120.00 a share to \$120.00 a share to \$120.00 a share well confine ourselves to our immediate heighbor, the Lucile Oil Company, which owns the property immediately adjoining ours in famous Section Stx, Township 21, Range 15 of the Coalinga district. Their property is separated from ours only by an imaginary line. What their Vice-President thinks of our property is clearly outlined in the letter printed below.

The Lucile Oil Company was organized and began selling, their stock a little over two years ago at 10 cents per share. They immediately began drilling Well No. 1, and within a year brought in this well, which is now producing and has produced steadily since that time on an average of 600 barrels per day, making the total production from this well at the present price of oil, \$256,800. They then went abead and drilled Well No. 2, which in the latter part of 1908 they brought in, and this well is producing about 1,000 barrels daily. This makes the production from the two wells about 1,500 per day. This Company is now paying its stockholders 20 per cent, per month dividends, and this fact is vouched for by a letter from the First National Bank of Hanford, which is produced below. This dividend is paid on the par value of the stock. There is none of this stock for sale whatever, but there are frequent bits for it on the San Francisco Exchange of from \$8.00 to \$15.00 per share. One Hundred Dollars in-

vested in this stock two years ago at 10 cents per share is therefore now paying \$2,400 per year in dividends and is worth \$15,000.

REMEMBER, these are not estimated figures of what will be or what can be—they are ABSOLUTE figures of the earning power and value of this stock to-day. Please get these figures firmly settled in your mind, then remember that the Coalinga Aladdin Oil Company are now at work on their first well, which is located just SIXTY-SIX YARDS from the Lucile No. 1 well; that within eight months this first well will be completed, and it is a mortal certainty that it will be at least a 500 barrels as an example. A 500-barrel well at the present price of oil produces \$15.00 each and every day, and this will net to the Coalinga Aladdin Oil Company about \$7.500 per month. It will require about \$5.000 of this money to go anead with the drilling of the two additional wells, leaving over \$1.000 per month for dividends within eight months. At the end of a year or fifteen months the other two wells will be brought in, and it seems mortally certain that these will also be at least 500-barrel wells, so that at the end of that time our production will net the Company \$27,050 per month, of which we shall require about \$10,000 to drill the three additional wells, leaving \$11,050 each month for dividends. At the end of two years' time we should have from six to eight wells producing at least \$10,000 to drill the three additional wells, leaving \$11,050 each month for dividends. At the end of two years' time we should have from six to eight wells producing at least \$600 barrels each per day, which would mean \$55,400 net per month to the Company, or \$576,800 per year, which is over \$5 per cent, on the par value of the entire capitalization, \$1,000,000.00. This is figured at the present price—\$5 cents—of oil. The price of California oil is constantly increasing, and \$1.50 oil is confidently predicted within two years. These figures are all based on the history of the Lucile Oil Company, and there is no reason why they should be discounted one-tenth of one per cent.; in fact we have been more than conservative, for we have only figured on 500 barrels, while the history of the Lucile Company shows that we have a perfect right to expect 1,000-barrel wells. Have we not therefore clearly proven the assertion made in the headlines of this advertisement?

That this stock offering, just because it promises the same tremendous returns, should not be confused with the ordinary 10, 15 and 25 cent stocks offered to the general public by unreliable, or we might say, unthinking financial agents, is clearly shown by the following letters:

COALINGA, CAL. January 4th, 1909.

LUCILE OIL COMPANY

In conversation with Mr. E. W. Preston a few days ago I remarked that the Coalings Aladdin Oil Company property adjoining the Lucile was the very best absolutely proven piece of oil land in the whole Coalings district. He asked me if I had any objection to writing you to that effect. I am Vice President of the Lucile Oil Company, the best paying oil property in the State of California for it's size. I am also a large stockholder in the Amy 011 Company, whose property adjoins the Coalinga Aladdin Oil Company on the south. These are magnificent properties. Irrespective of this I only admit the truth when I say that the Coalinga Aladdin Oil Company property is the best piece of oil land to my knowledge

in the State of California and each well completed will surely

produce from six hundred to fifteen hundred barrells por day. Yours respectfully,

THE FIRST NATIONAL BANK

HANFORD. CAL Jan. 2, 1909.

In:

In response to your inquiry of recent date in rethe property of the Coalinga-Aladdin Oil Company which lies adjacent and West of the Lucie Oil Co. on Sec. 6 Thp. 21 South, Hange 16 East; will state that in my judgement, there is no better proven oil land in the Coalinga District than this property. The Lucie is the best producer for the number of walls drilled in the District and is paying 20% permonth dividends on the par value of its stock. And we know of no reason why the Coalinga-Aladdin kning whiting short distance and adjoining this property will not bring in equally as good wells and ensuring for many years to come. I know of no better property that is proven in the Coalinga District.

Olexima

The writer of this letter, Mr. Phelps, is the Vice-President of the Lucile Oil Com-pany, which adjoins our property on the east, and is a large stockholder in the Amy Oil, which adjoins our property on the south. He has no interest whatever in the Coalinga Aladdin Oil Company and has written this letter with the idea only of givng facts, and he certainly is to be commended as a broad-gauge man for stating a rankly as he does that our property, notwithstanding his holdings in these others, THE BEST OIL LAND IN THE STATE OF CALIFORNIA.

In considering this letter from the First National Bank of Hanford, let us impres upon you that none of the officers of this bank are in any way interested in the Coalinga Aladdin Oil Company, and they have no ulterior motive whatever in writing such a letter. It is simply a statement of facts, and such facts, vouched for by the

Oil Is Making Millionaires in California

And is making many of them. John A. Bunting, formerly a brakeman on the Southern Pacific Railroad, from the investment of \$170.00 has become a multi-millionaire. Joe Chanslor was a clerk in a Los Angeles store, and he is now rated at over \$5,000,000,000-every penny of it made in oil. We might go on and give dozens of such

cases.

Now we firmly, honestly and conscientiously believe that we are here offering a chance for every intelligent man and women who has a little money to really start on the road to the million mark by making an investment in the Coalinga Aladdin Oil

chance for every intelligent man and women who has a little money to really start on the road to the million mark by making an investment in the Coalinga Aladdin Oil Company stock.

After reading over all this matter, is there any way on earth you can figure out why we should not do just as well as the Lucile Oil Company, and if we do as well, what does it mean? It means that \$100.00 invested now will really provide you a sufficient income to live comfortably; every \$1,000.00 invested will really place you beyond the possibility of want.

We know how extravagant these figures sound. We have tried to be conservative and make these statements such that they will be believed by the most conservative business men, but to be honest and do justice to the subject we cannot figure the earnings any lower than we have. You understand that one of the reasons for the excessive earnings is that there is practically no cost whatever after the wells are bought in: in fact, with S wells on our property, the total cost of caring for them would be \$12.00 per day, and, remember, this is due to the fact that these wells are all flowers, that is, they do not have to be pumped—they are all of the gusher type.

There isn't a dollar's worth of stock that can be bought now in the Lucile Oil Company, which adjoins us on the east, the De Luxe or the Amy, which adjoin us on the south, or the Graham, which adjoins us on the north, nor in the Shreve property, which lies west of us, so we are confident in the assertion that no one with a dollar

PAR VALUE, \$1.00 PER SHARE

Price for One Week, 15 Cents

If all of the above statements are really facts, and can really be counted upon at their face value, do you not want some of this stock? If you have a single dollar in your possession we know that you will have to answer this question, "Yes." Well, take our word for it that we have not made a single statement which is not absolutely true in the most minute detail, and if you question our word or think that perhaps we are over optimistic, then take the word of the First National Bank of Hanford, as clearly outlined in their letter, and of another entirely disinterested party, Mr. Z. L. Phelps, whose letter is also reproduced above. We have six other letters in our Executive Office which are equally as strong and from equally representative people regarding this same property.

office which are equally as strong and from equally representative people regarding this same property.

For one week you can buy this stock at 15 cents per share. Unless people fall to read this advertisement we cannot understand how the amount of stock we have for sale can possibly last through the week. We therefore suggest that if you are interested that you immediately send in the subscription blank printed below, or, if you still want to investigate further, either write or wire in your reservation for stock, and we will hold this for you pending your further investigation.

SPECIAL INVITATION

We only regret that we cannot take you right to the property and show you there everything that we have told you in this advertisement, but, as this is not practical for Eastern people, if you will come to our office, No. 212 Flattron Building, we will be able to show you Surveyors' Maps of this Section Six, giving the exact location of our property; we will be able to show you the originals of all the letters regarding this property from Banks and prominent people in Coalinga; we will be able to show you samples of the Lucile oil just as it comes out of the ground, samples of the oil sand and shell formation and be able to give you every proof of all of our statements that is possible this side of the property.

Our President has recently returned from Coalinga, and he will gladly talk to and fully explain all of the points of this company to every one who is interested in securing some of the profits from California oil that are now being made.

the profits from California oil that are now being made.

office is open from 9 to 5 every day, but should you not be able to come during these hours and will so advise us, we shall be glad to arrange any time in the evening o you.
